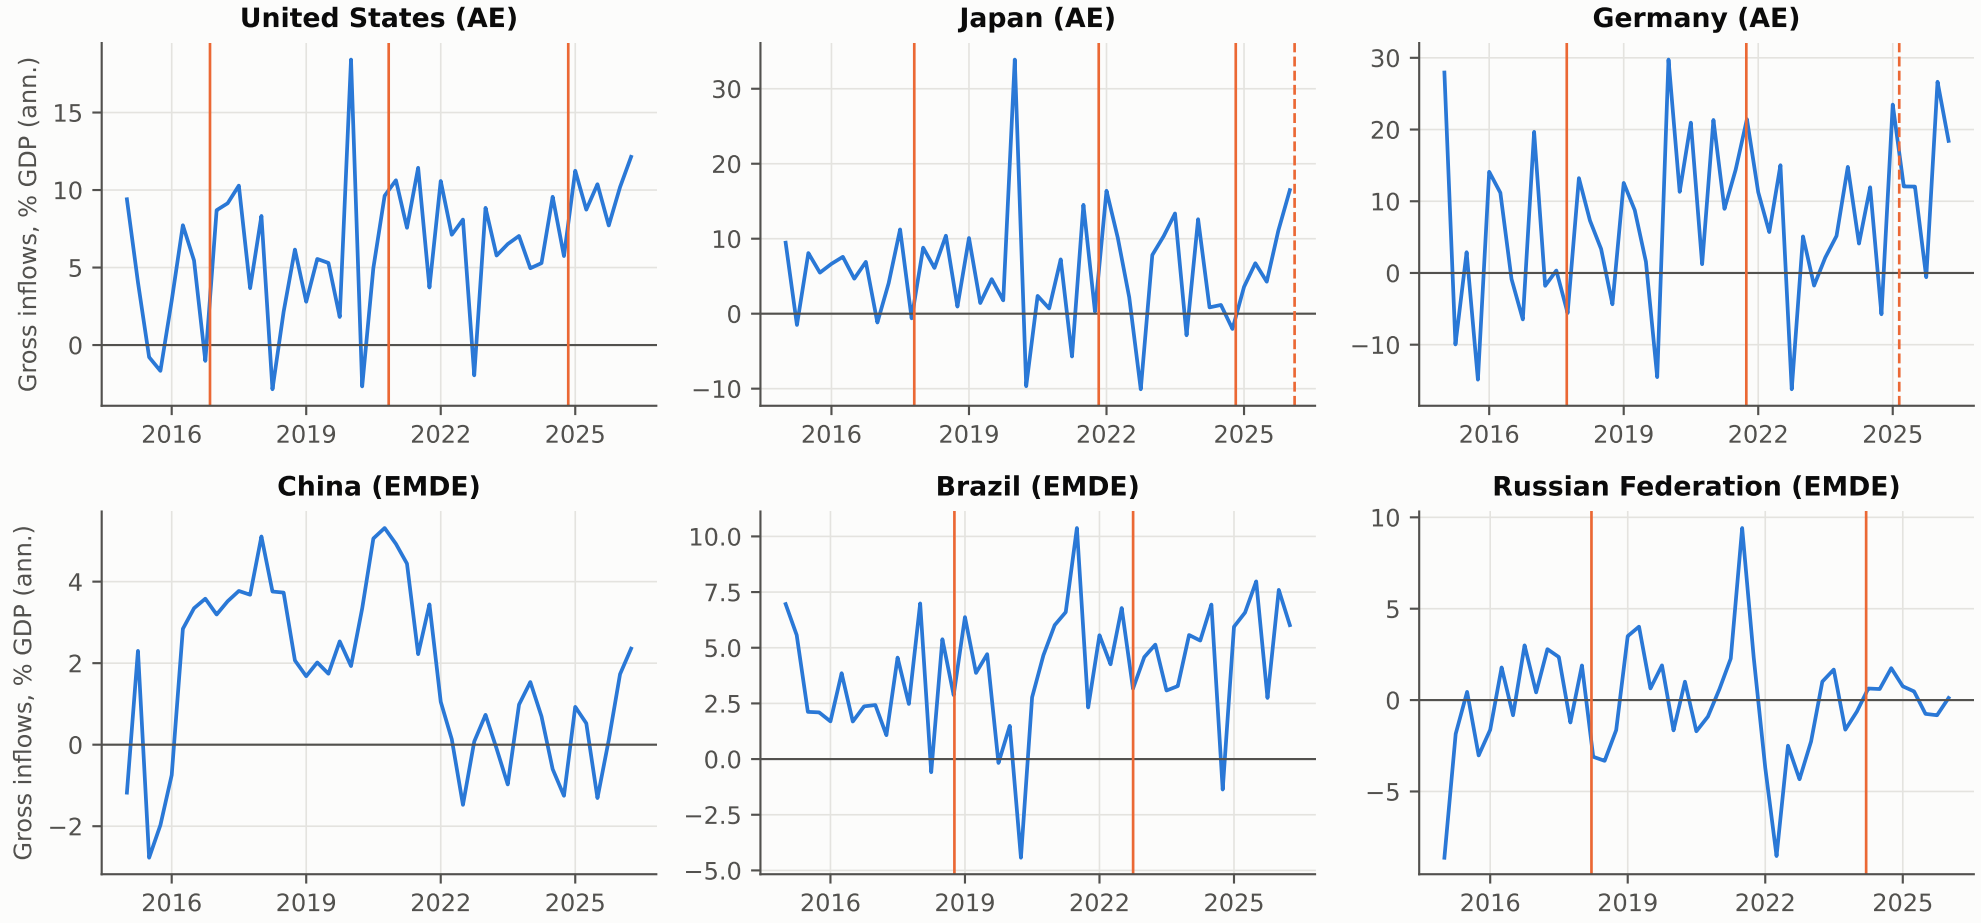
Figure 4. Gross inflows and executive-relevant elections — three largest AEs and EMDEs in the quarterly sample (2014 GDP)



Blue: gross inflows (unwinsorised), 100×4×quarterly flow/annual GDP; 2026 quarters use WEO-projected GDP and are partial-year. Orange solid: scheduled election; dashed: early (rule-based). Countries chosen by rule (largest 2014 GDP), not by pattern. Elections: Wikipedia calendars corroborated by IDEA/V-Dem.
